TRANSPORTATION

MARICOPA
COUNTY

EL MIRAGE ROAD LOOP 303 TO JOMAX ROAD FINAL DESIGN

A City of Peoria project administered by
the Arizona Department of Transportation

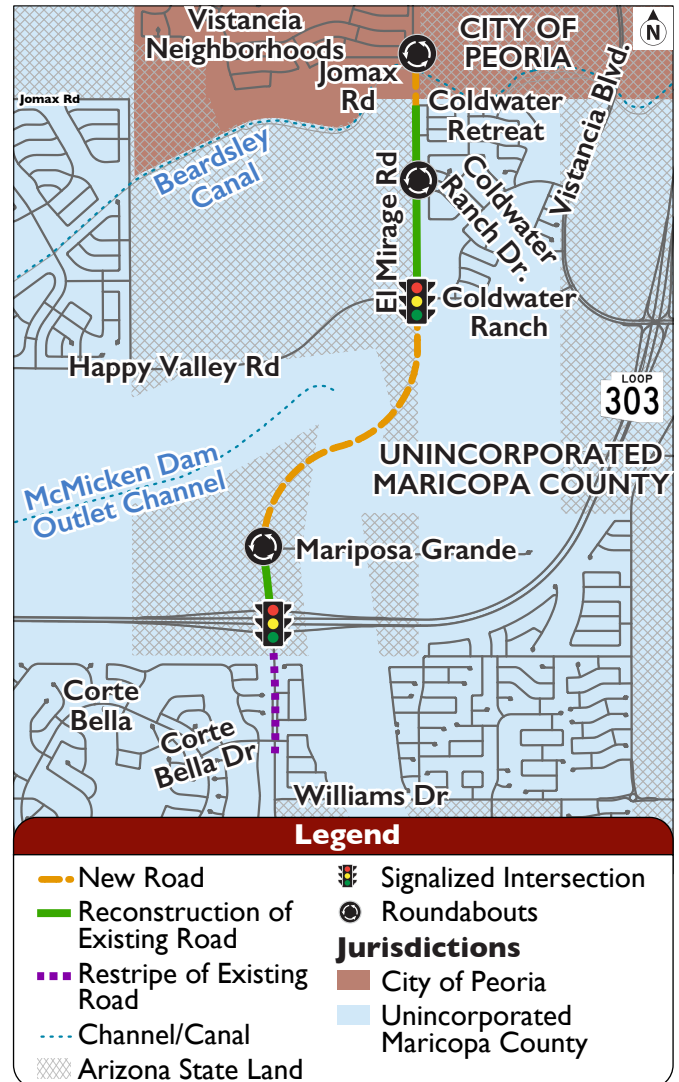

OVERVIEW

The City of Peoria and the Arizona Department of Transportation (ADOT) have initiated final design of a project to extend and widen El Mirage Road between Loop 303 and Jomax Road. This project is necessary to accommodate current and future travel demand, provide a new connection to Loop 303, improve local and regional connectivity, increase roadway capacity and enhance opportunities for future development.

PROJECT ELEMENTS

Improvements will include:

- Extending and widening El Mirage Road approximately 2.2 miles from Loop 303 to Jomax Road to provide two travel lanes in each direction, separated by a raised median, with a six-foot-wide bicycle lane and eight-foot-wide sidewalk in both directions.
- Restriping 2,000 feet of El Mirage Road between Corte Bella Drive and Loop 303. No new construction or roadway reconstruction will occur south of Loop 303.
- Constructing crossings over the McMicken Dam Outlet Channel and the Beardsley Canal.
- Signalizing the El Mirage Road intersections at the Loop 303 traffic interchange and Happy Valley Road.
- Installing roundabouts at the El Mirage Road intersections with Mariposa Grande, Coldwater Ranch Drive and Jomax Road.

PROJECT SCHEDULE

Final design began in spring 2026 and is expected to be complete in fall 2027. Construction is expected to begin in spring 2028 and take approximately 1.5 years to complete.

WHAT TO EXPECT DURING CONSTRUCTION

Access to El Mirage Road will be maintained at all times. Short-term roadway closures and nighttime and weekend work activities may occur. The City of Peoria and ADOT will provide advance notification and detour information. Construction will take place Monday through Friday, during the following hours:

- 5 a.m. to 5 p.m. | April 1 - Sept. 30
- 6 a.m. to 6 p.m. | Oct. 1 - March 31

ROADWAY DESIGN

This graphic illustrates the four-lane interim roadway cross-section. In both directions it will include an eight-foot-wide sidewalk, six-foot-wide buffer, six-foot-wide bike lane, one 11-foot-wide travel lane and one 12-foot-wide travel lane. The roadway will slope to the outside for drainage. The 38-foot-wide median is designed to accommodate future widening to the ultimate six lane configuration, which would provide three travel lanes in each direction with the same sidewalks, buffers and bike lanes. The four-lane interim roadway is expected to accommodate traffic through 2050.

ASK QUESTIONS AND PROVIDE COMMENTS

Comments on the final design can be made Oct. 19, 2026, through Nov. 6, 2026. Submit questions or comments in the following ways:
