EL MIRAGE ROAD:
LOOP 303 TO JOMAX ROAD
FINAL DESIGN

ABOUT THIS PROJECT

The City of Peoria and the Arizona Department of Transportation (ADOT) have initiated final design for a project to extend and widen El Mirage Road between Loop 303 and Jomax Road. This project is necessary to accommodate current and future travel demand, provide a new connection to Loop 303, improve local and regional connectivity, increase roadway capacity and enhance opportunities for future development.

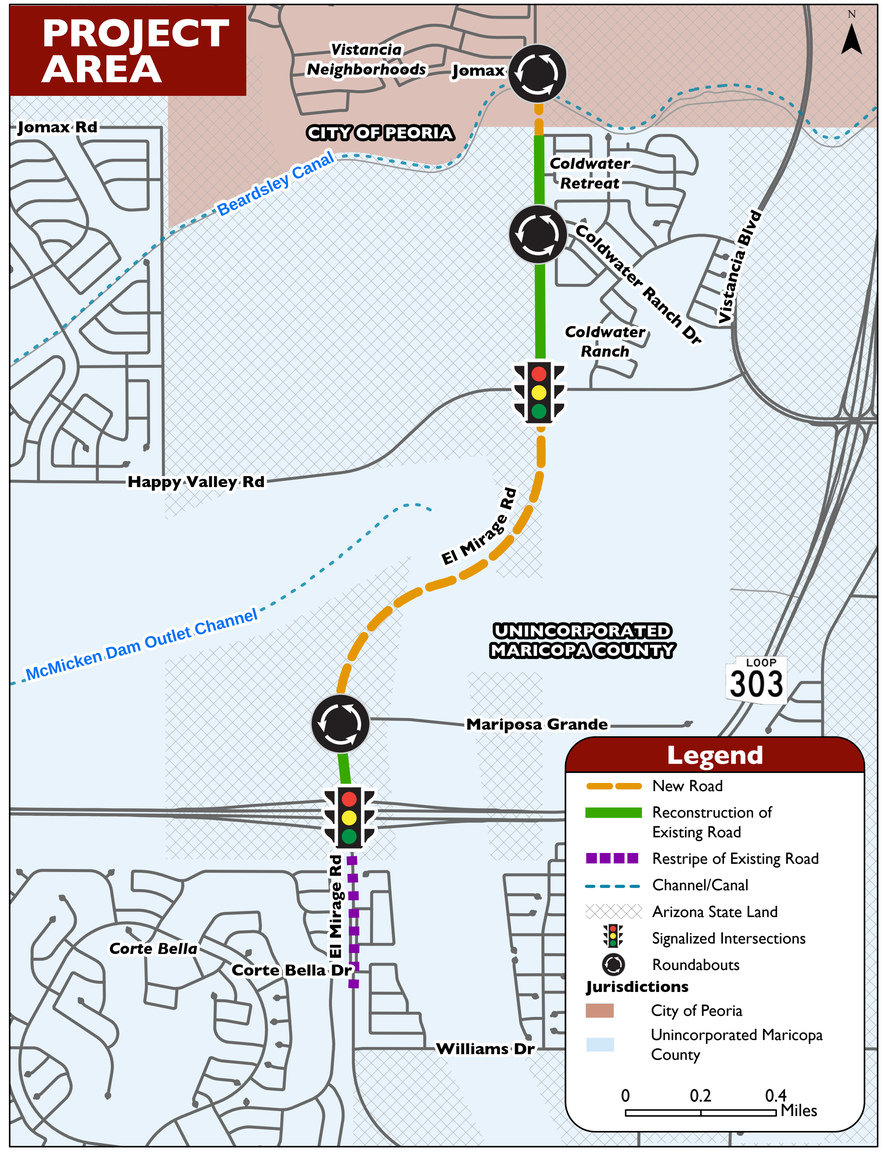

Improvements will include:

- Extending and widening El Mirage Road approximately 2.2 miles from Loop 303 to Jomax Road to provide two travel lanes in each direction, separated by a raised median, with a six-foot-wide bicycle lane and eight-foot-wide sidewalk in both directions.
- Restriping 2,000 feet of El Mirage Road between Corte Bella Drive and Loop 303. No new construction or roadway reconstruction will occur south of Loop 303.
- Constructing crossings over the McMicken Dam Outlet Channel and the Beardsley Canal.
- Signalizing the El Mirage Road intersections at the Loop 303 traffic interchange and Happy Valley Road.
- Installing roundabouts at the El Mirage Road intersections with Mariposa Grande, Coldwater Ranch Drive and Jomax Road.

FINAL DESIGN

FOUR-LANE INTERIM ROADWAY CROSS SECTION

This rendering illustrates the four-lane interim roadway cross-section. The roadway will slope to the outside for drainage. The 38-foot median will accommodate future widening to the ultimate, six-lane configuration. The four-lane interim roadway corridor is expected to accommodate traffic through 2050.
